

VOL. XXI.

BUCK AND LONGSTREET

ARRAYED OPENLY AGAINST EACH OTHER.

THE RIVAL GEORGIA HEADQUARTERS

WASHINGTON, March 7.—[Special.]—The republican office seekers of Georgia are here in great force.

Colonel Buck came today. He is quartered in an elegant suite of front rooms at the Elblitt, and has been surrounded every since his arrival by a horde of hungry office seekers.

General Longstreet, on the other hand, has quarters at 814 Twenty-first street, and he, too, has his factious following about him at all times.

WHAT THE CHIEFS ARE DOING.

Colonel Buck, escorted by his leading staff officers, headed by Colonel Locke, were at the white house this morning, but they were unable to see the president on account of the rush of callers.

General Longstreet did not strike quite so high today. He simply visited the state department, and is engaged in making himself solid with James G. Blaine.

THE FIGHT BETWEEN THE TWO LEADERS

Colonel Buck, on the other hand, said tonight that he was making no fight on General Longstreet, or any one else, he simply wants the offices given to the best men.

IN THE DEPARTMENTS.

THE NEW CABINET UNABLE TO ATTEND TO BUSINESS ON ACCOUNT OF VIOLENCE.

WASHINGTON, March 7.—[Special.]—The new cabinet members, Blaine, Sherman and Tracy, came to their respective offices early this morning, but if they had any idea of attending to official business, they must have abandoned it when they saw the number of people awaiting them.

NO OFFICIAL CHANGES HAVE YET BEEN RECORDED IN SUBORDINATE OFFICES.

THE FIGHT BETWEEN THE TWO LEADERS

Colonel Buck, on the other hand, said tonight that he was making no fight on General Longstreet, or any one else, he simply wants the offices given to the best men.

The resignation of T. A. Phillips, superintendent of transportation of the East Tennessee, seems to have made the employees of the system generally very happy.

There was no love lost between Mr. Phillips and the men who worked under him.

The train men especially are happy. It appears from what they say that Phillips was too much work for them in the line of exacting, and too much from them and discharging them promiscuously.

Two or three passenger conductors on the line, and the matter last night in the Kimball, and they were smiling.

"They tell me," said one, "that the boys down on the south end went off and got drunk when they heard it, so happy were they."

"I am just happy enough," said another, "to get drunk if it would do any good."

"And I would get drunk," said the third, "if I didn't have to go out and do my work."

"What he is going to do now?" was asked by some one present.

"To get the superintendent's name," was the answer. "But have you seen the Chattanooga Times on 17th?"

"I have seen the Chattanooga Times on 17th," said the first, "but Phillips going to do?" he was asked.

"I don't know and I don't care a particle," was the answer.

Here is what the Chattanooga Times says: "The news was received here by employees of the East Tennessee railroad, that Mr. Phillips had been in the line of exacting, and too much from them and discharging them promiscuously."

Two or three passenger conductors on the line, and the matter last night in the Kimball, and they were smiling.

EXPOSITION DIRECTORS.

Thirty of Them are Elected—How the Subscriptions are Coming In.

There are thirty instead of twenty-five directors of the Piedmont Exposition company. And the list embraces the best business men of Atlanta.

Yesterday evening the company met at the chamber of commerce, and Captain Joe Kingsberry was called to the chair.

Captain J. R. Wylie, chairman of the committee appointed to select suitable names for directors, stated that since the last meeting the by-laws had been amended so as to make thirty directors instead of twenty-five, as at first contemplated.

The committee then handed in the following list of names:

Messrs. C. A. Collier, H. W. Grady, J. R. Gramling, Joe Kingsberry, George M. Hope, J. A. Miller, H. L. Wilson, E. P. Black, P. H. Snook, W. W. Byrd, R. B. Bullock, Joe Thompson, B. F. Walker, S. H. Phelan, L. J. Hill, M. C. Kiser, J. H. Wylie, W. B. Miles, Forest Adair, H. Casselman, F. P. Rice, H. B. Tompkins, John T. Glenn, E. Rich, Ed. C. Peters, D. O. Dougherty, T. B. Brady, L. V. Gress and O. C. Fuller.

The entire board was unanimously elected. It was then moved that the directors meet at the chamber of commerce at eleven o'clock Saturday morning to perfect the organization.

At that time the matter will be definitely settled as to the position, and the committee will be appointed to secure the subscriptions and manage the other details of preparing for the exposition.

There is an enthusiastic determination on the part of the company to put it through, and they are determined to make it the biggest ever held in the south.

MR. JOE THOMPSON'S LIST.

Mr. Joe Thompson has been working hard, and has run his list up within a day. Additional contributions are: C. J. Vaughn, \$25; J. J. Duffy, \$25; S. T. Grady, \$25; W. C. Hogan, \$25; C. C. Kneebrew, \$25; C. P. Johnson, \$25; Atlanta City Brewing Company, \$250; P. J. Wallace, \$10.

In speaking of the exposition, yesterday evening a gentleman said: "Some are under the impression that it is no use for them to contribute, as the exposition will be held anyhow, and they will get the benefit of it just the same. This is a sad mistake. It is simply a business proposition. If the exposition is held, it will benefit all parties alike, and the bigger we make it, the bigger will be the profits to all concerned. If all will put their shoulders to the wheel, we will have just such an exposition as has never been witnessed before, but we can't afford to have anybody hanging back."

SOCIETY GOSSIP.

There was a most delightful entertainment at the Young Men's Christian association yesterday afternoon. This institution is getting celebrated for its entertainments. The young men were entertained yesterday afternoon, but the ladies were not.

At the last meeting of the Women's Auxiliary society of the Y. M. C. A., the idea was conceived that a reception to the ladies friends of the association, to be held at an early date, would serve to bring these ladies together, and that acquaintances might be made and a delightful time spent altogether.

Yesterday afternoon the Ladies Auxiliary gave a reception to about a hundred friends, who were met at the door by the president, Mrs. W. A. Hemphill, and given a hearty welcome. Amid music, conversation and refreshments a happy time was spent from 3 o'clock till 6. Many ladies met who, though neighbors, had never known each other before.

The auxiliary society is doing a great work for the young men of the association, and under the able management of the president, Mrs. Hemphill, is enjoying the greatest prosperity.

Miss Jennie Inman, daughter of the late W. H. Inman, of New York, is visiting her relatives in Atlanta. She is stopping for the present with her uncle, Mr. W. F. Inman, Peachtree street.

Tonight at the hall of the Y. M. C. A. the piano recital of Professor Joseph Denck, the famous pianist, will take place. Members will be charged only ten cents for admission; the admission for the general public is fifty cents. The following is the program:

Rondo Capriccioso.....Mendelssohn
Nocturne.....Chopin
Fantasia Impromptu.....Chopin
Rondo Brillante.....Weber
Souvenir d'Amérique.....Chopin
Reading.....Mr. John Sharp
God Save the Queen.....Gottschalk
Reminiscences of Lucia.....List
Members admitted for ten cents; general admission fifty cents.

Last night at their residence, 169 Rawson street, Mr. and Mrs. Jacob Hirschberg gave a pleasant entertainment in honor of Miss Sarah Silverman, their charming guest. The evening was culminated by plays and dances, after which refreshments were served. There were present: Misses Hennie Franklin, Hennie Sue Franklin, Ella Franklin, Liza Hartman, Bertha Hartman, Sarah Hartman, Hennie Cohen, Rosa Schneider, Blanche Isaac, Rebecca Gutman, May Wolfe and Bertha Layman.

Messrs. Otto J. Meyer, Joe A. Gershon, A. W. Rosenfeld, Aaron Gutman, A. Drucker and Simon Metzger.

The finest Chewing Tobacco made, Alex Stephens.

THE PNEUMONIA

IS GETTING TO BE A DREADED WORD.

Do you know what it is?

"It is a local form of manifestation of the bad condition of the blood." If your blood is filled with the products of faulty secretions, a "cold" is liable to produce "pneumonia," or lung fever.

When the attack comes on, summon the best obtainable physician, or what is better,

PREVENT IT

THEY WERE FINED.

THE WHISKY CASES COME UP IN RECORDER'S COURT.

THE NEWS FROM POLICE CIRCLES

Two New Cases Against Minors Were Made Yesterday. A Burglar Caught—There Was a Sad Scene at the Depot Last Night, But a Life Was Saved.

The three boys who were tried yesterday morning for entering a place where spirituous and malt liquors were for sale were fined each \$5.75.

The first case tried was that of Charlie Hightower, the negro boy.

It seems that Hightower's mother and another woman wanted some beer. The other woman agreed to furnish the money if Hightower's mother would send the boy after the beer. This was agreed to and the boy carried to the bar an order for the beer. The order was signed, not by the boy's mother, but by the other woman.

This order was exhibited in court and it was argued for the defense that though the boy's mother had not signed the order, as the letter of the law requires, it was signed in her presence and the boy went at her suggestion.

But the boy was fined \$5.75 or six days in the stockade. He was unable to pay the fine and was sent to the stockade.

The second case was that of Melvin Wolf, and another fine point in law was raised by the defense. The boy went to present a bill and not for any other purpose as was contemplated in the ordinance. He went on a matter of business, just as he would go into a dry goods store.

But he was fined \$5. And paid his fine.

The third case was that of William Pittman, another white boy. He had no excuse to offer, and was fined \$5.

The cases were not tried before Judge Anderson, as he was unavoidably absent from the city. The tribunal yesterday consisted of Councilmen Meador, Amerson and McLendon.

Two new cases were entered yesterday, and will be tried in recorder's court this morning. They are against John Webb and Oscar Ghoshlen.

Both cases were made by Patrolman Chandler.

The practical moral in the case of young Wolf is that boy collectors, whose business carries them into barrooms, had better provide themselves at once with an order from their parents or guardian authorizing them to enter saloons.

The most remarkable fact in connection with these cases is that not one of them was made by Jumbo Hunter.

Not one.

A BURGULAR CAUGHT.

Will Latimore, a young negro twenty or twenty-two years of age, was arrested last night by Patrolmen Christopher, Taylor and Conn. The arrest was made in Brooklyn about 8 o'clock last night. Latimore was asleep when the officers went in on him with cocked pistols, and it was very fortunate that it happened just that way. Latimore is a dangerous character and well known in police circles.

The charge against him is burglarizing a jewelry store on Whitehall street some time ago.

A CHILD'S LIFE SAVED.

An Episode in Life About the Union Passenger Depot.

A sad scene was witnessed at the ladies waiting room in the union depot last night.

A white lady was traveling with three little children, two boys and a girl. All the little ones, as well as the mother herself, were poorly clad and were exhausted by travel.

One of the little boys was kept in the mother's lap, as was the little girl, a baby at the breast. The boy was breathing heavily and kept moving about restlessly as though in great agony. The other child slept at his mother's feet on the bare stone floor.

The poor woman divided her time between the baby and the sick child, and a more pathetic picture would be hard to imagine.

The little boy grew worse rapidly and seemed to be choking. The mother did all that she could, but was unable to help the child, and finally Night Superintendent Stovall telephoned to police headquarters for a city physician.

A city physician, a city physician, said he could not be found, but Dr. Bob West, who had been found, came promptly. He said at once that the little fellow was choking to death from a spasm of the constrictor muscles or trismus—a spasm of the muscles of the throat.

He worked promptly and skillfully, and in fifteen or twenty minutes the spasm was broken and the little boy was breathing naturally. The child's life was undoubtedly saved by the prompt and efficient treatment of Dr. West.

The mother was very grateful, and as a fitting finale for the little scene a generous collection was made up by the railroad men and passengers, and given to her.

Her name was Mrs. Sarah Higgins, and there is a story in the trip she is taking. It seems that some time ago her husband deserted her and she has been looking for him in Birmingham or Aniston. She is going now on an almost hopeless search for her husband. If she can find him in Aniston, or this side of Aniston, she will remain in Aniston with relatives.

FOR THE VETERANS.

Two Atlanta's Seed Liberal Donations to the National Home.

When the call for funds for Confederate veterans is made, Atlanta never fails to respond. Yesterday George was an illustration of this.

The Georgia Railroad company furnished free transportation for a bale of cotton and a bale of cotton goods, both of which went on the same train toward New York, consigned to Mr. Chauncey M. Depew.

The story of these donations is that Mr. Depew wrote Mr. Sid H. Phelan to know if the Atlanta cotton exchange would contribute a bale of cotton to be shipped to the New York exchange, there to be sold at auction for the benefit of the National Confederate Veterans' home, at Austin, Texas.

There being no regular cotton exchange here, Mr. Phelan set about raising the funds with which to purchase one for that purpose.

It did not take him long to raise the money. In his hands he met Governor Bullock, to whom he appealed, explaining the matter.

"I will do this," said Governor Bullock, "if you will secure the funds to purchase the bale of cotton. I will contribute a bale of our cotton goods, made at the Atlanta cotton mills for the same purpose."

Mr. Phelan purchased the cotton, and Governor Bullock sent the goods.

So, there will be lively bidding in the New York exchange when two bales of southern product are put up at auction. They will both bring fancy prices, and will materially to the fund which is being raised for such a noble charity.

THE GRAND JURY ADJOURNS.

Henry Downs's Case Results in a Return of No Bill.

Henry Davis, alias Henry Downs, will not be tried for burglary in Fulton county.

The grand jury returned no bill yesterday morning.

From the testimony brought out in the justice court trials, it is evident that Downs is a lunatic, and the grand jury could hardly find a bill in the face of such facts as were proven by the witnesses at the committal trial. Downs will probably go back to the asylum where he belongs, and his acquittal will have to remain dormant for a while at least.

The grand jury adjourned at noon yesterday until the first Monday in April. This was done so that the committee may have time to inspect the various matters of public interest according to the requirements of the law.

During their three days' session these gentlemen have done a lot of work.

Out of a large number of cases presented,

THE BEST OF ALL.

IS THE CITY OF ATLANTA'S SEWER SYSTEM.

A Talk With Councilman Haas on the Work Being Done—The Cost of Perfecting the Sewer System.

Atlanta is rapidly perfecting the finest and most complete sewer system in the south.

The work is all being done from a sanitary standpoint, and the \$100,000 which has been appropriated for it is being carefully and judiciously expended by the committee, Mr. Haas, chairman, and Mr. Meador, secretary.

That trio of councilmen give every piece of work a careful investigation before it is begun, and then watch it through its construction.

Mr. Haas is especially attentive to the work. He is thoroughly awake upon the necessity of good sewers, and ambitious to have a monument to himself in the sewer system he has inaugurated.

For he did inaugurate it. He was a member of the sewer committee, and in a short time his usual incisive disposition led him to an investigation which resulted in finding flaw after flaw with the work.

Then he began working to secure a sanitary engineer and finally succeeded. Since becoming chairman of the committee, Mr. Haas has been more avowed, if possible, than ever to produce a perfect system. He fought hard to secure an appropriation from the city of \$80,000 for this year's work, but failed.

"Had I been given that money," he said yesterday, "we could have a great work."

"How much will you spend this year?" he was asked.

"Every dollar that we can get will be expended and expended carefully. The fund set apart to us was \$47,500. We wanted \$80,000. Then to that you can add about \$30,000, which we can draw from assessments. This will give us the \$100,000, nearly."

"What do you mean by assessments?"

"This: Sewers are built in two ways in Atlanta. One class of sewers will be built by the city and paid for by the city; another will be built by the city and the amount collected from abutting property. These are called assessment sewers and the other trunk lines."

"How much sewer work have you paid out?"

"Of the money nearly every dollar has been set aside for the work, which is being done. It went this way: Loyd street sewer, \$12,000; Cox street sewer, from Spring to Old, \$1,000; Cox street sewer, from Old to the city, \$1,000; Power and Lovejoy, \$1,000; South Boulevard, \$1,000; Orange street extension, \$1,000; Mineral spring sewer extension, \$1,000; Hilliard, Ford and Bell street sewers, \$1,000; Orange street extension, \$1,000; Walker street sewer, \$1,000; Piers and Walker street sewer, \$1,000; Old Walnut street sewer, \$1,000; Inverts, etc., \$1,000.

Total, \$47,500.

"So you see the money has gone."

"How much assessment work have you done?"

"We've seen. The two Edgewood avenue sewers are \$6,000 and \$2,000. That's \$8,000. Then the Courtland street sewer is \$3,000. That's \$11,000. Then the Jackson street sewer is \$2,000. But the sewer is paid by the city and owned by the property owners. That then would make the assessment work \$9,000."

"There'll be no trouble about the collection."

"Atlanta never fails to collect money due her, because her people are not that kind. This \$50,000 is now in the treasury. It has been set aside out of the city funds, and as the work is paid by the city and owned by the city, when the sewer is completed, the money will be collected from the property owners without trouble and returned to the city."

"What sort of sewers are you constructing?"

"It has been the policy of the committee to put sanitary sewers upon every street in the city that is being permanently improved by paving, and we expect to spend in that way the \$50,000 set aside for it. Last year, if you remember, the committee on the sewer system was voted unanimously adopted a uniform assessment on sewers."

"What is it?"

"It was found, after long years' work and careful calculation, to be about the average price. Then, again, take a man who has a small pipe will carry away his sewerage, and he would pay by its diameter. Then take the poor man who lives in the bottom. The hills upon which he lives are so steep that he has a sewer two or three times bigger than his wealthy neighbor on the hill. He pays for it, too, by the same measurement, and of course carries off sewage. The man who has a small pipe will carry away his sewerage, and he would pay by its diameter. Then take the poor man who lives in the bottom. The hills upon which he lives are so steep that he has a sewer two or three times bigger than his wealthy neighbor on the hill. He pays for it, too, by the same measurement, and of course carries off sewage. The man who has a small pipe will carry away his sewerage, and he would pay by its diameter. Then take the poor man who lives in the bottom. The hills upon which he lives are so steep that he has a sewer two or three times bigger than his wealthy neighbor on the hill. He pays for it, too, by the same measurement, and of course carries off sewage. The man who has a small pipe will carry away his sewerage, and he would pay by its diameter. Then take the poor man who lives in the bottom. The hills upon which he lives are so steep that he has a sewer two or three times bigger than his wealthy neighbor on the hill.
